## Out of Network Patients

Our practice is not contracted with your insurance. We can see you as an out of network patient. What that means is that essentially you are a cash pay patient. You will pay your full financial responsibility for any appointments or procedures up front. We will submit a claim for the service provided to your insurance as a courtesy to you. Your insurance might pay you directly something for the service provided. However, sometimes they might not pay anything for any service for an out of network provider. We will not submit any other claims or appeals to your insurance in case of any denials. This is your responsibility with your insurance.
